Summary

A passionate software engineer, focusing on results-driven approaches specializing in building scalable backend systems and dynamic frontends. Proficient in Python, Java, Node.js, and modern UI frameworks, with a proven track record of end-to-end project delivery. An adaptable technologist dedicated to continuous improvement, actively bridging current expertise with emerging skills in Go, DevOps, and mobile ecosystem development.

Skills

Core Skills:

- **Programming Languages:** Python, Java, JavaScript, HTML, CSS
- **Frontend:** SvelteKit, React.js, Astro.js, Next.js, Tailwind
- **Backend:** Node.js, Express.js, Django, Spring, JWT, WebSocket, RESTful API
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite
- **Others:** Docker, Git, CI/CD (GitHub Actions), Postman, Figma, Agile/Scrum, WSL

Soft Skills:

- **Interpersonal Skills:** Collaboration, Teamwork, Communication, Adaptability, Problem-Solving
- **Languages:** Burmese (Native), English (Advanced)

Projects

- **Google Summer of Code 2026 Proposal:** Formulated and submitted a comprehensive project proposal to the Django organization, including a dedicated Git repository showcasing framework proficiency.
- **Carpark Management API (Django, PostgreSQL, CI/CD):** Addressed the necessity for streamlined HDB parking data distribution, implemented a Dockerized Django REST framework API, establishing a robust, Railway-deployed backend infrastructure that efficiently processes centralized data requests.
- **Adopt Me (Svelte, Node.js, Express.js, REST API, SQLite):** In order to facilitate community-driven pet adoptions, built a comprehensive full stack application pairing a Svelte frontend with a Node.js and SQL backend, yielding a secure platform equipped with authenticated user profiles and dynamic content management.
- **Financial Tracking Application (Java, Spring Boot, Svelte, Docker):** Securing the essentials for personal finance management, engineered a robust RESTful API with Java and the Spring framework, delivering a reliable backend architecture capable of accurately processing and tracking user transactions.
- **Calories Calculator (React):** In order to simplify health tracking, developed a responsive React web app, resulting in a fast, hosted fitness dashboard with Vercel.

Work Experience

Aung Thein Than Co., Ltd – Yangon, Myanmar

Electronic Engineer – Jan 2020 – Feb 2023

- Participated in repairing electric machines, control systems, and maneuvering fixing instrumentation systems by following work order and collaborative actions with other departments.
- Implemented IoT configurations for generators using Arduino microcontrollers and Embedded C.
- Analyzed and traced PCB circuits and electrical components, adhering strictly to schedule and ISO protocols.
- Spearheaded and supervised generator installations for Datacenters.
- Reviewed technical vetting sheets and provided solution documents to senior engineers.

Myanmar World Distribution Co., Ltd – Yangon, Myanmar

Intern Engineer – Sept 2017 – Jan 2018

- Assisted Computer Hardware for troubleshooting as a service provider alongside team members.
- Delivered contributions to the CCTV installation team as a support with NOC Engineers.
- Backed the Network Engineers with configuration fundamentals for server maintenance.
- Collaborated with co-interns for fiber optics installation district by district while learning functions of fiber optics fusion splicers.
- Attained the knowledge of data transmission via participating in monitoring server control centers.

Education

University of Auckland – Auckland, New Zealand

Postgraduate Certificate in Information Technology – Oct 2023 – Sept 2024

University of Bedfordshire – Luton, United Kingdom

Bachelor of Engineering with Honours (Electronic Systems) - Aug 2015 – Oct 2019

Certifications

- [Introduction to Software Engineering \(IBM\)](#)
- [Introduction to Cloud Computing \(IBM\)](#)
- [Introduction to Agile Development and Scrum \(IBM\)](#)
- [Introduction to DevOps \(IBM\)](#)
- [Spring Framework \(LearnQuest\)](#)

Awards

University of Bedfordshire: *First Class Awards in Bachelor of Engineering with Honours*

University of Adelaide: *30% Global Citizens Scholarships Winner*
